

Ecocycle MW7

It provides passive cooling and up to 80% energy savings with the additional heat exchanger it contains. It has 2 heating modes.

In heating mode 1, it can heat **0 degrees** water from the source up to **35 degrees** and operates with a capacity of **6.96 kW** and an efficiency of **COP 4.60**. In heating mode 2, on the other hand, it can heat **10 degrees** water from the source up to **35 degrees** and works with a capacity of **9.50 kW** and an efficiency of **COP 6.05**.

Technical Specifications

Capacity	7kW
Circulation Pump	Internal
Compressor	BLDC Twin Rotary
Operating Modes	Cooling, Heating, How Water
Mixing Valve	Internal
Power Supply	380V
Reactor Coolant	R410A
Size H/W/D (mm)	710/710/1020
